

Asian American Federation

2012 New York State Assembly Districts and Asian Communities

Asian American Federation Census Information Center

Introduction

The Asian American Federation presents this briefing paper on the Asian populations in each of the 65 Assembly Districts that cover New York City.¹ Using 2010 Census and American Community Survey data, this paper covers the total Asian population as well as the Asian ethnic groups that reside in the Assembly Districts that were created through the 2012 districting process. We will also identify the Asian languages most commonly spoken in each district.² Our goal is to help state legislators engage and serve their Asian American constituents.

Overall Asian Population

Table 1 summarizes the Asian population data by Assembly Districts that cover New York City. Asian New Yorkers are no longer confined to ethnic neighborhoods. Over 10,000 Asians resided in 38 out of 65 districts. In fourteen districts, over 20 percent of residents were Asian.

Currently, three Assembly Districts are Asian majority (District 25, 40 and 49), up from only one district following the 2002 districting process. Assembly District 40 centered in Flushing remains the district with the largest Asian population, followed by District 25 in Northeast Queens along Long Island Expressway; and District 49 encompassing Sunset Park, Brooklyn. In addition, three districts had more than one in three residents who were Asian: District 65 in Lower Manhattan (including Chinatown); District 24 in Northeast Queens along Grand Central Parkway; and District 47 in Bensonhurst, Brooklyn.

Highlights for Asian Groups

The overall Asian population numbers disguise the diversity and disparate residential patterns that underlie the Asian community. **Table 2** presents the Asian ethnic group population for each Assembly District covering the city. This section will highlight

which Assembly Districts have the most population for each of the larger Asian groups.

Bangladeshis were the fastest growing Asian group with more than 10,000 city residents. District 24 in Queens had the largest Bangladeshi population among all districts, followed closely by District 34 in Queens and District 44 in Brooklyn. District 87 in the Bronx also had around 3,500 Bangladeshis. Sixteen districts had over 1,000 Bangladeshi residents, among which eleven were in Queens, three were in the Bronx, and two were in Brooklyn.

Chinese³ remained the largest Asian group in the city, making up about 44 percent of all Asians. District 49 encompassing Sunset Park, District 65 in Lower Manhattan, District 40 in Flushing, and District 25 in Northeast Queens all had more than 40,000 Chinese residents. Thirteen districts had over 10,000 Chinese residents, among which eight were in Queens, four were in Brooklyn, and one was in Manhattan. At least 1,000 Chinese resided in 49 out of a total of 65 Assembly Districts.

Filipinos were the fourth largest Asian group in the city. The largest Filipino populations all resided in Queens. District 39 in Queens had the largest Filipino population, followed by District 30 and District 24 respectively. The top seven districts with over 2,500 Filipino residents were all in Queens, followed by District 63 in Staten Island with 2,416 Filipinos. At least 1,000 Filipinos resided in 30 out of 65 Assembly Districts.

Indians, the second largest Asian group, had more than 1,000 residents in 52 out of 65 Assembly Districts. The top twelve districts with over 5,000 Indian residents were all in Queens, except for District 44 in Brooklyn with 5,825 Indians. District 24 had the largest Indian community, with more than 20,000

residents, followed by District 31, 33 and 38 with more than 10,000 residents.

The districts with the most **Japanese** were concentrated in Manhattan. District 75 had the most Japanese with 2,287, followed closely by District 67 with 2,147. Among the top eleven districts with over 1,000 Japanese residents, eight were in Manhattan, two were in Queens, and one was in Brooklyn.

Koreans were the third largest Asian group in the city. The largest district was District 40 in Queens, with almost 20,000 Korean residents. District 26 and 25 in Queens were close behind with more than 10,000 Korean residents. At least 1,000 Koreans resided in 23 out of 65 Assembly Districts.

Pakistanis were largely split between Brooklyn and Queens. The district with the most Pakistani residents was District 44 in Brooklyn, followed by District 45 and 47 in Brooklyn and District 24 in Queens. Among seventeen districts with over 1,000 Pakistani residents, eight were in Queens, seven were in Brooklyn, one was in Staten Island, and one was in the Bronx.

A few districts had concentrations of more than 1,000 residents for several of the smaller Asian groups in the city. **Nepalese** residents reached the 1,000 resident threshold within District 39 and 34 in Queens. More than 1,000 **Taiwanese** residents lived in District 25, 40 and 26 in Queens. District 39 in Queens also had more than 1,000 **Thai** residents. Districts 80 in the Bronx had more than 1,000 **Vietnamese** residents.

Three Assembly Districts in Queens had at least seven Asian groups reaching a population threshold of 1,000 residents, which presents an outreach challenge. District 39 had eight different Asian groups reaching the threshold: Bangladeshi, Chinese, Filipino, Indian, Korean, Nepalese, Pakistani, and Thai. The two other districts had seven Asian groups passing the threshold: Districts 34 and 36. Beyond those three districts were 21 districts that had at least five different Asian groups with over 1,000 residents.

Languages Spoken

The Census Bureau reports fourteen different Asian language categories in the American Community Survey detailed tables. Of these, ten of these language categories were widely represented in the city by

more than 10,000 speakers each. **Table 3** presents the top five languages other than English spoken as well as any additional Asian language categories that had more than 1,000 speakers for each district. The diversity of languages spoken in the city points to a major challenge faced by those who wish to reach out to the Asian community.

Chinese was the most common Asian language spoken in the city. However, the variety of dialects spoken in the city and the usage of traditional and simplified scripts presents further challenges when reaching out to the Chinese-speaking population. District 49 encompassing Sunset Park had the largest Chinese-speaking population with 47,238 speakers, followed by District 65 in Lower Manhattan with 46,810, and District 40 in Flushing with 38,602. Among all the languages spoken other than English, Chinese was the most spoken language group district-wide in District 49 in Brooklyn, District 65 in Manhattan, District 40 and 25 in Queens, and District 47 in Brooklyn. Among Asian languages, Chinese was most commonly spoken in 42 out of 65 Assembly Districts. About 46 out of 65 districts had at least 1,000 Chinese speakers.

The languages of South Asia together were the second largest group of Asian languages in the city. The Census Bureau reports several of the languages separately.

- **Urdu** was the fifth largest Asian language group in the city, spoken mostly by Pakistanis and Indians. District 42 in Brooklyn and District 83 in the Bronx were the only ones where Urdu was the most commonly spoken Asian language group. District 44 in Brooklyn had the most Urdu speakers with 3,353, followed closely by District 45 in Brooklyn with 2,924 and District 34 in Queens with 2,143. About 19 out of 65 districts had at least 1,000 Urdu speakers.
- **Hindi**, mostly spoken by Indians in the city, was the seventh largest Asian language group. District 24 in Queens had the most Hindi speakers with 2,501, followed by District 40 in Queens with 2,148. The top eleven districts with over 1,000 Hindi speakers were all in Queens, except for District 74 in Manhattan with 1,021 speakers.

- **Gujarati**, mostly spoken by Indians in the city, was the tenth largest Asian language group. District 24 in Queens was the only one with over 1,000 Gujarati speakers.
- **Other Indic languages**, the second most common Asian language category in the city, were represented mainly by Bengali (mostly spoken by Indians and Bangladeshis), Punjabi (mostly spoken by Indians and Pakistanis), and Nepali. District 24 in Queens had the largest number of speakers of other Indic languages with 10,830, followed closely by District 34 in Queens with 9,507. Other Indic languages were the largest Asian language group in 13 out of 65 Assembly Districts. About 26 out of 65 districts had over 1,000 other Indic languages speakers.
- Some other South Asian languages were grouped in the other Asian languages category described below.

Korean was the third most common Asian language in the city. District 40 in Queens had the largest number of Korean speakers at 16,580, followed by District 26 with 13,700 and District 25 with 9,373. District 26 in Queens was the only district where Korean was the most widely spoken Asian language group. At least 1,000 Korean speakers resided in 18 out of 65 districts.

Tagalog was the fourth largest Asian language group in the city. District 39 in Queens had the largest number of Tagalog speakers of 3,472, followed by District 24 with 2,969 and District 34 with 2,919. The top seventeen districts with over 1,000 Tagalog speakers were mostly in Queens, except for District 63 in Staten Island and District 81 and 80 in the Bronx.

Japanese was the eighth largest Asian language group in the city. District 75 in Manhattan had the largest Japanese-speaking population with 1,565, followed by District 73 with 1,532 and District 66 with 1,500. Outside Manhattan, District 36 in Queens had 1,455 Japanese speakers. The top eight districts with more than 1,000 Japanese speakers were mostly in Manhattan, except for District 36 and 28 in Queens.

Vietnamese was the ninth largest Asian language group in the city. District 80 in the Bronx was the

only one with over 1,000 Vietnamese speakers at 1,465, followed by District 78 in the Bronx with 837.

Citywide, there were less than 5,000 speakers of **Khmer, Hmong, Thai, and Laotian**, which were the remaining Asian languages that were reported separately by the Census Bureau. Many New York residents spoke an Asian language beyond the Asian languages reported separately. These residents were grouped into the category of **other Asian languages**. For the city, this category included primarily Malayalam, Tamil and Telugu which were mostly spoken by Indians and Sri Lankans and was the sixth largest Asian language group. District 39 in Queens had the largest number of these speakers with 2,524, followed by District 33 in Queens with 2,219. Outside Queens, District 63 in Staten Island had 1,963 speakers. Among the eleven districts with over 1,000 speakers of other Asian languages, eight were in Queens, two were in Brooklyn, and one was in Staten Island.

Footnotes

¹ Because the Census Bureau now can collect multiple responses to the race and ethnic categories, we now have detail race and ethnic data on those who self-identify as multiracial. We chose to define Asian as any person who identifies in whole or in part as Asian American. Likewise for each of the Asian ethnic groups, we chose to define membership based on the same criteria. As a consequence, it is not possible to add together different race and ethnic categories and get an accurate total because multiracial individuals are counted in multiple categories. For example, someone who identifies as Chinese and Indian would be counted in each of those categories and be double counted in a sum of the Chinese and Indian populations.

² Data source used in this brief were the 2010 American Community Survey (ACS) 5-Year Estimates for language spoken data and 2010 Census for population totals.

³ Chinese population in this report excludes those who identified as Taiwanese, who are tabulated separately.
